Contents Volume 55

Contents

Editor's corner: Talk About a Software Crisis – Not!
R.L. Glass 1

Kendra: adaptive Internet system
J.A. McCann, P. Howlett and J.S. Crane 3

Dynamic adaptation of sharing granularity in DSM systems
A. Itzkovitz, N. Niv and A. Schuster 19

Hierarchical loop scheduling for clustered NUMA machines
Y.-M. Wang, H.-H. Wang and R.-C. Chang 33

A frame of reference for the performance evaluation of asynchronous, distributed decision-making algorithms
S. Ghosh, T.S. Lee and S.-S. Joo 45

Conflict free transaction scheduling using serialization graph for real-time databases
V.C.S. Lee and K.-W. Lam 57

Changing class behaviors at run-time in MRP systems
Y. Mustafa and O. Mejabi 67

Distinguishing sharing types to minimize communication in software distributed shared memory systems
T.-Y. Liang, J.-C. Ueng, C.-K. Shieh, D.-Y. Chuang and J.-Q. Lee 73

Simulating multiple inheritance in Java
E. Tempero and R. Biddle 87

Editor's corner: A good-bye of sorts
R.L. Glass 101

Heuristic search revisited
A.-E. Al-Ayyoub and F.A. Masoud 103

Data placement schemes in replicated mirrored disk systems
A. Vakali and Y. Manolopoulos 115

A spatiotemporal database model and query language
D.H. Kim, K.H. Ryu and H.S. Kim 129

An open and safe nested transaction model: concurrency and recovery
S.K. Madria, S.N. Maheshwari, B. Chandra and B. Bhargava 151

Newsmonger: a technique to improve the performance of atomic broadcast protocols
S. Mishra and S.M. Kuntur 167

List ranking on processor arrays
H. Çam 185

Automated translation of JSD into CSP – a case study in methods integration
W.L. Yeung 193

Enhancing online catalog searches with an electronic referencer
D.C.C. Poo, T.-K. Toh and C.S.G. Khoo 203

A simple micro-payment scheme
M.-S. Hwang, I.-C. Lin and L.-H. Li 221

A timed workflow process model
H. Zhuge, T.-y. Cheung and H.-k. Pung 231

Handling signature purposes in workflow systems
K.R.P.H. Leung and L.C.K. Hui 245

Digital watermarking models for resolving rightful ownership and authenticating legitimate customer
P.-L. Lin 261

Anomalous intrusion detection system for hostile Java applets
G. Helmer, J. Wong and S. Madaka 273

A modified remote login authentication scheme based on geometric approach
H.-Y. Chien, J.-K. Jan and Y.-M. Tseng 287

Optimizing storage utilization in R-tree dynamic index structure for spatial databases
P.W. Huang, P.L. Lin and H.Y. Lin 291

Comparing case-based reasoning classifiers for predicting high risk software components
K. El Emam, S. Benlarbi, N. Goel and S.N. Rai 301

Delegated multisignature scheme with document decomposition
T.-C. Wu, C.-C. Huang and D.-J. Guan 321
